PROJECTS

Where Is My Bus?	An iOS app to find the nearest MTA bus stop and get the bus that stops at that stop and their respective next arrival time. Where Is My Bus? is built with Swift and using the MTA Bus API.
Sint Maarten Quiz	An Alexa Skill that quizzes based facts on Sint Maarten. It is implemented in Javascript and deployed on AWS Lambda.
Vendedy	A startup project assisting on mobile and website development using Ionic and Django rest framework respectively. The web development I've assisted on the management site and some of its api's endpoint. The mobile app, I've worked on the main features such as login, signup, newsfeed, update profile pages and etc.
Django Hackathon Starter	A boilerplate application for Django web applications made for a class/open-source project in Spring 2015. I worked on API usage examples and methods for handling OAuth for its respective APIs. The APIs I worked are: Twitter, Instagram, Tumblr, Github and LinkedIn.

EXPERIENCES

AOL <i>Software Engineer Intern</i>	New York, NY	06/2016 - 06/2017
Exploring innovative and trending software and hardware technologies at Area51. Develop new ideas and concepts to future-proof solutions while using software development life cycle. Working on projects using technology stacks such as AngularJS, Android, iOS, JSON, XML, and NodeJS; and integrating projects with IoT devices.		
<ul style="list-style-type: none">Increased a company's brand video content consumption by creating a Fire TV appIncreased brands' content consumption by incorporating them into an open source smart mirror application which integrates AngularJS with ElectronDeveloped a Slackbot for digital marketers to get insight of campaigns.
